

Charlotte Guldbæk

Interaction Designer

9000 Aalborg, Denmark

email: cmguldbaek@gmail.com

www.linkedin.com/in/cguldbaek

Who is Charlotte?

I don't like the idea of defining myself by my study, but the aspects of interaction design describe my interests pretty well: UX research, because I find people and their needs and habits super interesting; computer science, because I also find it interesting to learn about what we interact with, and how it works; and last, but not least, there is the creative aspect, allowing me to come up with concepts and communicate them to others.

IT Competences

Programming

- HTML & CSS
- C
- C#

Wireframing

- Figma

- SoMe

Language Competences

- Danish (native)
- English (fluent)
- Italian (basics)
- German (basics)

Free Time

I love learning new things and getting good at them. It sounds cliché, but I love seeing improvement in my drawing skills, just like I feel a certain pride when I notice my progress in understanding Italian as self-taught. My interest in learning new languages may have a connection to my interest in seeing the world and its cultures.

Though I love experiencing other countries, I also love a good night in. To me, an ideal evening could just as well consist of having a couple of friends over for dinner and a glass of wine, followed by, for instance, a board game. (I won't say no to a karaoke night either)
