Who is Charlotte?

During my time at Aalborg University I have really enjoyed working with a bunch of different people, as well as problem areas. This was partly why I decided to study Interaction Design; this has given me the opportunity to create a bridge between users and designs - one that I believe we often tend to forget about. To me, it is important that the users' thoughts and needs are taken into account in the design process, and that we, as designers, adapt to this process with the users in mind.

IT Competences

Programming

- HTML & CSS
- C
- C#

Wireframing

- Figma
- Adobe XD
- Balsamiq

Illustration

- Procreate
- Photoshop
- Gimp

Other

- Microsoft Office programs

2022:

Teaching Assistant in System Analysis and Design (AAU)

- Helping with exercises and assignments regarding system development, e.g., system definitions, class diagrams, use cases

2021:

Teaching Assistant in User-Centred Design (AAU)

- Preparing exercises for the students
- Answering questions regarding data gathering and analysis

Volunteer Work

2021-now:

Vice President, i-Life Aalborg

- In charge of meetings
- Planning and executing events for international students
- SoMe

Language Competences

- Danish (native)
- English (fluent)
- Italian (basics)
- German (basics)

Free Time

I love learning new things and getting good at them. It sounds cliché, but I love seeing improvement in my drawing skills, just like I feel a certain pride when I notice my progress in understanding Italian as self-taught. My interest in learning new languages may have a connection to my interest in seeing the world and its cultures.

Though I love experiencing other countries, I also love a good night in. To me, an ideal evening could just as well consist of having a couple of friends over for dinner and a glass of wine, followed by, for instance, a board game. (I won't say no to a karaoke night either)
